Stonecrop *Sedum Larinum* Park', **Sweet**
Birch *Betula*, **Sweet Shrub** *Calycanthus*
floridus, **Witchhazel** *Hamamelis Virginiana*,
Yarrow *Achillea millifolium*

Sponsorship

"Sponsors" protect an item in the garden. Their support provides for professional guidance, amendments, and fertilizers to insure the life of the special tree, shrub, or plant.

Native Plant Trail

We have a two-phase project to create a Native Plant Trail, where many of these sponsored items live. This Trail has been carefully planned to insure that we have the right plants in the best places. The first phase, which is nearing completion, incorporates a range of carefully selected native plants, with a special focus on medicinal plants. During the second phase we will introduce a number of plants designated "at-risk" or "to watch" that are native to our area.

We are listed on the National Registry as a Botanical Plant Sanctuary. With the help of United Plant Savers we will introduce endangered plants and carefully foster them.

Elderberry
Sambucus Canadensis

Sponsorship Options

The Dr. John Wilson Community Garden is growing and we need your help! A number of trees, shrubs, and plants are being installed for the benefit of the entire community. But they need your help to thrive.

All sponsors will receive a certificate acknowledging what item they have sponsored with its location in the garden, as well as acknowledgement on our website and Facebook page. In addition, our garden bed sponsors will also receive a plaque in the bed that they sponsor.

Virginia Pine
Pinus virginiana

This is not part of our garden, but is more appropriate for the holidays.

During the rest of the year, this picture is a Basswood tree.

2012 SPONSORSHIP REGISTRATION FORM

(Please fill out the following information completely)

NAME TO BE HONORED _____

NAME OF DONOR (if different) _____

ADDRESS _____
